This document outlines the benefits of the myBlueprint program and provides the log in tools to create an account for yourself or your students. After students have set up their account, we would suggest a first step would be for the student to complete the five “Who am I” assessments. From there, students can branch out to explore some of the career results suggested from their assessments.

What is myBlueprint?

A comprehensive education and career/life planning program with the tools students need to make the most informed decisions about their future

Discover yourself

Five comprehensive Who Am I assessments help students discover their learning and personality styles, interests, desired knowledge, and motivation factors. Job specific compatibility surveys unlock powerful occupation matches based on real-world tasks to better inform student self-discovery.

Track towards graduation and beyond

The high school course planner allows students to visually plan towards province-specific graduation requirements while instantly discovering their eligibility for every post-secondary pathway in Canada.

Explore your opportunities

Backward or forward planning with the most comprehensive post-secondary and career databases. Search, filter, and compare local, province-specific information on apprenticeships, programs, and occupations to ensure students make better decisions and are more prepared for the future.

Record and share what matters

Keep track of important experiences, activities, achievements, skills, and more with highly configurable resume and cover letter builders. Classroom, core competency, or career portfolios (to name a few) help convey student learning with documents, images, videos, and more. Students can then easily share an interactive portfolio link with others.

Learn real world skills

Understand the basics of money management and improve your financial literacy with actionable budgets, learn how to set and track towards SMART goals, and discover what local employers are looking for with job search tools that provide local, up-to-date listings tied directly to your occupations of interest.
